PROGRESS IN BIOPHYSICS & MOLECULAR BIOLOGY

An International Review Journal

Volumes 74, 75 and 76

Volume Contents and Author Indices

PII: S0079-6107(01)00016-5

PERGAMON

CONTENTS OF VOLUME 74

Numbers 1–2

Protein structural dynamics by single-molecule fluorescence polarization
Joseph N. Forkey, Margot E. Quinlan and Yale E. Goldman 1

Single molecule force spectroscopy in biology using the atomic force microscope
Jordanka Zlatanova, Stuart M. Lindsay and Sanford H. Leuba 37

Mechanical design of proteins studied by single-molecule force spectroscopy and protein engineering
Mariano Carrion-Vazquez, Andres F. Oberhauser, Thomas E. Fisher, Piotr E. Marszalek, Hongbin Li and Julio M. Fernandez 63

The importance of molecular structure and conformation: learning with scanning probe microscopy
Bettye L. Smith 93

Twisting and stretching single DNA molecules
Terence Strick, Jean-Francois Allemand, Vincent Croquette and David Bensimon 115

Numbers 3–5

The infrared absorption of amino acid side chains
Barth, A. 141

Chloride in smooth muscle
Chipperfield, A.R. and Harper, A.A. 175

CONTENTS OF VOLUME 75

Numbers 1–2

Self-organisation and orderly processes by individual protein complexes in the bacterial cell
Kuthan, H. 1

Polarity and form regulation in development and reconstitution
Schiffmann, Y. 19

The emergence of life on Earth
Lahav, N., Nir, S. and Elitzur, A. C. 75

Number 3

Determining the structure of biological macromolecules by transmission electron microscopy, single particle analysis and 3D reconstruction
Ruprecht, J. and Nield, J. 121

Gating of voltage-dependent potassium channels
Fedida, D. and Hesketh, J.C. 165

CONTENTS OF VOLUME 76

Numbers 1–2

The interrelationships of side-chain and main-chain conformations in proteins
Chakrabarti, P. and Pal, D. 1

Protein folds propelled by diversity
Paoli, M. 103

Number 3

Predicting properties of intrinsically unstructured proteins
Bright, J.N., Woolf, T.B. and Hoh, J.H. 131

Erratum to "Protein folds propelled by diversity"
Paoli, M. 175
